

Lesson Title: Rad Ratings- Game 2

Objective: To engage students in active participation and keep track of their understanding through a point system.

Materials: PowerPoint presentation, 10 cards per student

Procedure:

- Distribute 10 cards to each student at the beginning of the lesson.
- As you work through the slides, instruct students to raise radionuclide card they think is best suited to each application. Cards can be used more than once to make the game easier- if you want to make the game more challenging the students should be instructed to return the cards to the pack once it has been used.
- Keep track of points throughout the lesson.

Assessment: Observe student participation and understanding through the raising of cards and awarding of points.
